MEMORANDUM FOR THE UNITED STATES INTELLIGENCE BOARD

SUBJECT: Immediate and Continuing Photo
Reconnaissance of Communist China

1. The Committee on Overhead Reconnaissance recommends in the attached paper that the United States Intelligence Board approve a comprehensive photo reconnaissance program against selected objectives in Communist China. This program in addition to intelligence objectives takes into account the need for periodic recoverage of targets in relation to the current Communist Chinese buildup and strategic considerations.

2. It should be noted that as of this date permission exists for six TACKLE missions, three against South China and three in the area of Communist Chinese buildup opposite Taiwan. These will be accomplished as rapidly as weather permits and should meet some but by no means all of the requirement set forth in the comprehensive program.

3. This paper is placed on the agenda for the meeting of 27 June, at least for preliminary consideration.
